

Safety Systems

SmartVu 4K Dash Camera.

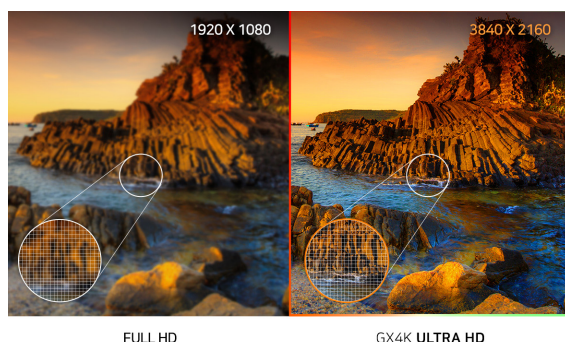

Never miss a thing with longer recording thanks to Smart Park Mode.

The SmartVu 4K Dash Camera delivers ultimate recording clarity with its 8.46MP SONY™ Starvis Sensor and industry-leading 4K resolution. Its advanced Smart Park Mode can record more than 2,000 hours while using less power than standard parking mode—keeping your car protected longer without draining your battery. Plus, enjoy built-in speed camera alerts for smarter driving.

Dual configuration for ultimate recording coverage.

4K Ultra HD recording so you never miss a detail.

KEY FEATURES

- Helps to provide evidence in the event of an accident by recording both video & audio on every drive.
- Premium video quality thanks to the SONY™ STARVIS image sensor in the front camera features Ultra-HD "4K" resolution (3840x2160p) recording.
- The rear camera also features Full-HD resolution (1920x1080p) recordings.
- Automated night vision adjusts brightness and contrast to ensure clarity no matter the time of day.
- Includes a 64GB memory card, which can be removed and plugged into a PC for downloading and sharing videos.
- Wi-Fi enabled for compatible smartphones using the WiFi App, save important videos on the go.
- Built-in GPS for keeping time, date, location and speed information.
- Smart park mode consumes significantly less power than industry standard by impact monitoring only*.
- Low-voltage battery protection and Ai heat protection.
- Built-in speed camera alerts.
- Hidden wiring installation meaning no messy wires.

Smart Park Mode

Records the moment impact occurs and then resumes power-saving sleep mode. The power-saving sleep mode is designed to consume very little power and only recording a 20-second impact trigger.
