

# Vehicle tracking with motraklite

Since re-opening, dealerships across the UK have been working hard to ensure their staff, customers and premises are protected from the threat of COVID-19.

Whilst potential buyers are able to visit stores and talk with sales staff (following strict social distancing protocols), vehicle test drives must be conducted alone, which can pose a potential security risk.

### Introducing: Motraklite

At **sgfleet** we understand the concerns dealerships have regarding the safety of vehicles on independent test drives. As such, we have developed Motraklite, a portable tracking product. Designed especially for dealerships, this product is built up from our fleet tracking solution, Motrak.

#### Key features:

- Fully portable device
- Visibility and location of test drive vehicles
- Easily re-chargeable via 240v
- 3-hour charge time
- Small compact device
- Easily installed
- Flexible mounting
- Verification of driving offences
- Monitors and provides understanding of driver behaviour
